

AN ENGAGEMENT TO OUR COMMUNITY

Our corporate social responsibility is more than a sheer and honest commitment. It is an integral part of McDonald's, featuring a long history of community involvement. The Al Qasimi Foundation of Ras Al Khaimah also believed in the importance of community engagement to strengthen their partnership with the local community and local business. The Foundation not only views engagement as a social responsibility, but also as a tool for improving the value, relevance and the effectiveness of its own work.

At McDonald's, we are committed in supporting our local community in all possible ways, providing a unique working environment for our employees to serve our customer better to enhance their McDonald's experience. We really appreciate the Al Qasimi Foundation Team for choosing our company to be part of their local student program by giving them a great opportunity to have a meaningful learning experience in our restaurant.

We also want to recognize the outstanding performance of all McDonald's Al Safeer Management Team & Staff 54061 for their hard work, dedication and contribution to the success of this event. The Al Qasimi Foundation Team and some local teenager students visited our restaurant and they experience variety of activities during the shift such as learning the history of McDonald's, Hands-on experience in different working stations (Fries- Chaser- FC- Runner- Sundae/Drink drawer), they joined the Open Door Program, Fun time activities and enjoyed the free meal at McDonald's.

They had a very professional, welcoming & highly informative restaurant experience!!!
